EXPERIENCE

DRATA | Senior Product Designer

Aug 2022 – Present

Designed enterprise product experiences for a compliance automation platform, working as a strategic design partner with 10+ product managers and up to 10 engineering pods. Selected as the lead designer for Drata's AI pillar.

- Pioneered Drata's AI-first framework mapping experience, a self-serve workflow surfacing AI-generated recommendations for custom compliance frameworks, reducing a 6-week Drata-assisted process to hours.
- Designed Drata's first AI-assisted vendor risk assessment, with guided workflows analyzing vendor documentation against security criteria, reducing reviews from weeks to hours. Partnered with 6 enterprise customers to validate workflows prior to release.
- Established the AI UX Framework for Drata designers, translating collaborative research into actionable documentation and a Claude-powered tool generating AI-pattern-aligned prototyping prompts.
- Built Drata's AI design foundation: four AI design playbooks, 6 AI UX design principles, and 9 AI Trust Patterns for agentic transparency and user control.
- Developed a four-stage AI personality model adopted as Drata's product vision for progressive AI autonomy.
- Led research and product design for Evidence Library, enabling compliance evidence to be reused across multiple controls and synced with engineering tools including Jira, ServiceNow, and Asana.
- Delivered Trust Center features including an analytics dashboard and a Salesforce integration automating document access approvals using CRM data.
- Contributed to Constellation, a platform-wide redesign implementing a new design system across the platform.

HealthCare.com | Product Designer

Sep 2021 – Jul 2022

Designed user experiences for an online health insurance marketplace, collaborating closely with a dedicated research team.

- Conducted moderated user interviews and usability testing across the insurance quoting journey.
- Synthesized research insights to identify usability and trust issues impacting plan selection and conversion.
- Redesigned landing pages, quoting flows, and checkout experiences to improve clarity and user confidence.
- Introduced clearer information architecture and comparison features to help users navigate complex insurance options.

Strut Learning | UXUI Designer

Dec 2020 – Sep 2021

Designed digital learning experiences for Emojo, an adaptive learning platform supporting academic and emotional development.

- Designed UX and interface components for a personalized learning platform used by both teachers and students.
- Collaborated with product and engineering teams to deliver adaptive learning experiences and curriculum features.
- Conducted iterative design exploration and usability testing to improve engagement and accessibility.

EDUCATION

Cetys Universidad

2018 – 2020

Master's degree, Engineering and Innovation

2010 – 2014

Bachelor's degree, Mechatronics

International Exchange: Università degli Studi di Bergamo, Italia.

PUBLICATIONS

Nov 2021

Designing Support Tools for Young Adults with Autism to Self-Manage Stress and Anxiety

Published in ACM Digital Library

- Conducted HCI research using user-centered and participatory design methods.
- Designed and tested low- and high-fidelity prototypes with stakeholder evaluation.
- Explored interaction design approaches for mental health support tools.
